# page.tpl.php

---

Default theme implementation to display a single Drupal page.

The doctype, html, head and body tags are not in this template. Instead they can be found in the `html.tpl.php` (`/api/bootstrap/templates%21system%21html.tpl.php/7`) template in this directory.

Available variables:

General utility variables:

- **\$base\_path**: The base URL path of the Drupal installation. At the very least, this will always default to `/`.
- **\$directory**: The directory the template is located in, e.g. `modules/system` or `themes/bartik`.
- **\$is\_front**: TRUE if the current page is the front page.
- **\$logged\_in**: TRUE if the user is registered and signed in.
- **\$is\_admin**: TRUE if the user has permission to access administration pages.

Site identity:

- **\$front\_page**: The URL of the front page. Use this instead of `$base_path`, when linking to the front page. This includes the language domain or prefix.
- **\$logo**: The path to the logo image, as defined in theme configuration.
- **\$site\_name**: The name of the site, empty when display has been disabled in theme settings.
- **\$site\_slogan**: The slogan of the site, empty when display has been disabled in theme settings.

Navigation:

- **\$main\_menu (array)**: An array containing the Main menu links for the site, if they have been configured.
- **\$secondary\_menu (array)**: An array containing the Secondary menu links for the site, if they have been configured.
- **\$breadcrumb**: The breadcrumb trail for the current page.

Page content (in order of occurrence in the default `page.tpl.php` (`/api/bootstrap/templates%21system%21page.tpl.php/7`)):

- **\$title\_prefix (array)**: An array containing additional output populated by modules, intended to be displayed in front of the main title tag that appears in the template.
- **\$title**: The page title, for use in the actual HTML content.
- **\$title\_suffix (array)**: An array containing additional output populated by modules, intended to be displayed after the main title tag that appears in the template.
- **\$messages**: HTML for status and error messages. Should be displayed prominently.
- **\$tabs (array)**: Tabs linking to any sub-pages beneath the current page (e.g., the view and edit tabs when displaying a node).
- **\$action\_links (array)**: Actions local to the page, such as 'Add menu' on the menu administration interface.
- **\$feed\_icons**: A string of all feed icons for the current page.
- **\$node**: The node object, if there is an automatically-loaded node associated with the page, and the node ID is the second argument in the page's path (e.g. `node/12345` and `node/12345/revisions`, but not `comment/reply/12345`).

Regions:

- **\$page['help']**: Dynamic help text, mostly for admin pages.
- **\$page['highlighted']**: Items for the highlighted content region.
- **\$page['content']**: The main content of the current page.
- **\$page['sidebar\_first']**: Items for the first sidebar.

- **\$page['sidebar\_second']**: Items for the second sidebar.
- **\$page['header']**: Items for the header region.
- **\$page['footer']**: Items for the footer region.

## Critical & Major Issues

- Bootstrap(7.x-3.6) Theme and Drupal 7.51 (<https://www.drupal.org/node/2813507>)
- Some forms not rendered in bootstrap theme (<https://www.drupal.org/node/2755911>)
- Bootstrap relies on Googlecode for HTML5Shiv, which no longer exists (<https://www.drupal.org/node/2724195>)
- Horrible incompatibility with other modules (<https://www.drupal.org/node/2705903>)
- Documentation on drupal-bootstrap.org (<https://www.drupal.org/node/2671132>)

## Recent Commits

- Fix typo (<http://cgkit.drupalcode.org/bootstrap/commit/?id=aa3e13c07568b9c804b72638ea0d48920f6406ca>)
- Issue #2653084 by markcarver: Checkboxes/Radios are wrapped using a panel (<http://cgkit.drupalcode.org/bootstrap/commit/?id=e793a4f442296af86be391b51cd45d8933b1d0d6>)
- Issue #2820392 by sittard: Reset button doesn't work on AJAX enabled views (<http://cgkit.drupalcode.org/bootstrap/commit/?id=62938ceb3938a0ea5f975f21299068a54b6fa161>)
- Issue #2547797 by markcarver, estoyausente: Add composer.json to Bootstrap (<http://cgkit.drupalcode.org/bootstrap/commit/?id=82c9b71a0d43b6ef836c8466ac9e03b0c19b9cfd>)
- Issue #2547797 by estoyausente, markcarver: Add composer.json to Bootstrap (<http://cgkit.drupalcode.org/bootstrap/commit/?id=319e7d1b85d2304d2ceaa0e9701ead600e879c2d>)

## Issue Queue Activity

- Document @BootstrapUpdate plugin (<https://www.drupal.org/node/2822800>)
- Issues in subtheme documentation (<https://www.drupal.org/node/2821932>)
- Drush CR and Performance -&gt; Clear Cache: Not the Same Function (<https://www.drupal.org/node/2821504>)
- Views table sticky header isn't working (<https://www.drupal.org/node/2821299>)
- Compatible with 8.2 Settings Tray module? (<https://www.drupal.org/node/2821008>)
